DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species A, figs. 1-3a-3b, claims 1-23 in the reply filed on 3/4/2005 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Khan et al. (US 2003/0048574 A1)

The applied reference has a common inventors Raquib U. Khan, and Mohammad M. Ameen, except Chris M. Woldemar is not common with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1-23, Khan et al. disclose all the aspects of the claimed invention as shown in Figs. 1-3 for the structure of a disc drive storage system including a spindle motor, regarding one of the stationary component and the rotatable component is substantially comprised of silicon containing copper alloy (see paragraphs 28, and 32-33 in the spec).
